

## DRY BILL READY FOR FINAL TEST

HOUSE CLEARS DECK FOR CLOSING SKIRMISH UPON REFERENDUM LAW—TO BE DISPOSED OF IN TWO WEEKS.

Springfield, Ill., Mar. 9.—Two of the measures of the legislative session, the constitutional convention solution and the statewide prohibition referendum bill, will be finally disposed of during the next two weeks, according to a tentative program agreed upon late yesterday by the leaders.

Six lessons . . . . \$5  
Private classes—Appointments can be made for any hours for groups of friends.  
All teaching by Mr. Maguire personally.

## SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, glossy and attractive.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite for those who desire dark hair and a youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

## Make No Mistake

When in need of glasses always go to a doctor of well known ability, for very often other physical ailments affect the eyes as much as the need of glasses. No matter how costly your glasses, their real value lies in the perfect adaptation of each lens to each eye. No pair of eyes are exactly like another pair of eyes. You might as well try to pass another photograph on your friends as yours, as to try to deceive your eyes with cheap glasses.

I can fit any eye that can be fitted and give you any up-to-date style or quality of glasses.

**GARLINGTON**  
EXPERT IN GLASSES  
OTTAWA, ILL.

lution, which was adopted several weeks ago by the senate, will come up for a final vote in the house next Wednesday. The statewide prohibition bill, which also was passed by the senate some time ago, will be voted upon in the house on Wednesday of the following week. This bill was allowed to go to third reading in the house yesterday without objection. The wets offered no amendments.

With the constitutional convention and the chief dry bill out of the way the gates will be opened for a flood of other legislation.

### Labor Measures Heard.

Bills backed by organized labor prohibiting the issuance of injunctions against peaceful picketing and providing a trial by jury in contempt cases occupied the attention of the judiciary committee of both houses.

Stephen S. Gregory, of Chicago, former president of the American Bar Association, appeared before the house judiciary committee in support of the bills. He represented a group of men and women of Chicago not actively identified with organized labor who signed a petition to the legislature requesting the passage of these measures.

Several minor liquor bills were acted upon in the senate and house. Senator Wood's bill creating a three-mile dry zone around McKendree College was passed by the senate. A bill proposing a three-year prison sentence for bootleggers was advanced to third reading in the house after an amendment making the sentence life imprisonment was defeated by a vote of 71 to 37. A similar bill with less drastic provisions was advanced to third reading in the senate after receiving the approval of Senator Dailey, wet leader.

### Anti-Treating Bill.

An anti-treating bill imposing fines and jail sentences for buying an intoxicating drink for another person, was introduced in the house by Representative Flagg.

A bill prohibiting the sale or manufacture of any proprietary medicine containing more than 10 per cent of alcohol was offered by Representative Howard.

Senator Austin, chairman of a committee of Republican senators on private bank legislation, introduced on behalf of the committee the statewide bill prepared by Senator Buck.

Senator Turnbaugh introduced a bill repealing the Dunne waterway act.

### ILLINOIS BRIEFS.

Springfield—St. 10 o'clock in the evening little Arthur Smith was watching a roaring comedy. But fifteen minutes later it turned into a vampire reel and since vampires don't interest eleven year old boys, he went to sleep. When he waked up the janitor had just arrived to sweep out the theatre. It was daylight outside. Also his father, mother and the police had spent the night searching for Arthur.

Rock Island—This city will take on the look of a mobilization camp if a plan proposed at a meeting of the city commissioners is put into effect. The plan is to dress the police force in khaki instead of blue. Commissioner Liedtke conducted an investigation and found that khaki was much cheaper and that for serviceability it is much superior to the customary blue.

Taylorville—Young Mr. Cummings—as yet without a first name—probably will be annoyed through his life by stories of the confusion he caused by his arrival in the world. Cummings, who is a watchman at a railroad tower, called in a substitute and went home to have a look at his son, just arrived. The substitute forgot how to manipulate the levers and two Nabash passenger trains were held up an hour and two more half an hour. Cummings finally left his son and went to the rescue.

Springfield—A suggestion that the American Beauty rose be adopted as a Lincoln flower to be worn on the birthday of the Emancipator has been received by Mayor Baumann from San Elizabeth Beall, of Chicago. She asks that the mayor use his influence in starting a publicity campaign to give the idea publicity.

Alton—Dr. John Helper, of Wood River, started a campaign for Joseph Eckman, town clerk, for justice of the peace. Eckman turned the tables on Helper and made the former the candidate using the names secured by Helper to qualify Helper himself. The physician without informing Eckman of his intention secured enough signatures to the petition to place Eckman on the ballot. Eckman refused to run and quietly took the petitions around again with a change in name. Helper says he'll run.

Springfield, Ill., March 8.—Senator Dunlap entered a bill in the senate today providing for the creation of sanitary districts and for sewage disposal. Districts according to the provisions of the bill, may be formed in contiguous territories containing one or more incorporated towns or villages.

Much Extra Work in March. It's between seasons now, when few persons perspire as much as health demands. The result is double work for the kidneys, for the kidneys must throw out waste matter from the system that is eliminated through the pores when persons perspire. Overworked, weak or disordered kidneys need help now. B. H. Stone, Reading, Pa., writes: "Whenever I need a kidney remedy I rely on Foley Kidney Pills. They have been worth their weight in gold to me." W. D. Duncan.

## Five-Minute Talks by National Leaders

Thomas J. Tynan, Warden of the Colorado State Penitentiary at Canon City, is one of the leaders in American prison reform, a subject now prominent in the public mind. At the request of the International News Service he has written the following, exclusive article on convict problems:

By Thomas J. Tynan, Colorado State Penitentiary Warden.

I understand that in the three Federal penitentiaries, Leavenworth, Atlanta and McNeil's Island, there are confined about 4,000 men with very little work, if any, for them. If there is anything on earth that will ruin a man either on the outside or as a prisoner, it is idleness.

Sixty per cent of these men would be trustworthy under proper laws and under proper conditions—at least that has proven to be true in the handling of State prisoners in Colorado. With an indeterminate sentence law and a good-time law, granting a reduction of the minimum sentence for work on trust and honor outside and away from the prison walls 50 per cent, or 2,000, of these Federal convicts could be put to work immediately building highways in the national parks and forest reserves of this nation.

These 2,000 men could be employed year in and year out at such work as putting them at grading work in the Summer time and at rock work in the mountain canyons, such as we are now doing in Colorado, in the Winter time.

These 2,000 men could earn \$5,000 per day at this work, or \$1,500,000 per year. Work worth \$250 per day per man would not cost the government to exceed forty cents per day for the

keep of each man and would furnish healthy outdoor work for convicts. This would redeem and reform about 80 per cent of them, and there is fifty years' work ahead for all of the men the government could possibly put at this sort of work.

Senator Shafroth, of Colorado, has introduced such a bill in Congress and it is to be hoped that the nation will see fit, instead of locking its Federal prisoners up in prisons and allowing them to degenerate on account of lack of work, to take advantage of a law such as above mentioned and put these men at work developing the most wonderful system of natural parks in the world.

With roads through these national parks and on these forest reserves, their value would be increased untold millions and they would be the means of giving outdoor recreation to millions of our own citizens and of keeping at home millions of our dollars that before the war went to Europe, and would again go there when the war is finished.

The government by simply adopting Colorado's system can utilize this vast amount of labor in the development of these wonderful assets that are now lying undeveloped throughout the nation.

Not only could these men construct roads in the national parks and forest reserves, but could build military roads where necessary. With the scarcity of labor now prevailing it seems a burning shame that the taxpayers of the nation should have to maintain so many able-bodied men in idleness when these men should be bettering their own condition and enriching the nation by outdoor work as above outlined.

## Why "Anuric" is an INSURANCE Against Sudden Death.

Before an Insurance Company will take a risk on your life the examining physician will test the urine and report whether you are a good risk. When your kidneys get sluggish and clog, you suffer from backache, sick-headache, dizzy spells, or the twinges and pains of lumbago, rheumatism and gout. The urine is often cloudy, full of sediment; channels often get sore and sleep is disturbed two or three times a night. This is the time you should consult some physician of wide experience—such as Dr. Pierce of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Send him 10 cents for sample package of his new discovery, "Anuric." Write him your symptoms and send a sample of urine for test. Experience has taught Dr. Pierce that "Anuric" is the most powerful agent in dissolving uric acid, as hot water melts sugar; besides being absolutely harmless it is endowed with other properties, for it preserves the kidneys in a healthy condition by thoroughly cleansing them. Being so many times more active than lithia, it clears the heart valves of any sandy substances which may clog them and checks the degeneration of the blood-vessels, as well as regulating blood pressure. "Anuric" is a regular insurance and life-saver for all big mountaineers and those who deposit lime-salts in their joints. Ask the druggist for "Anuric" put up by Dr. Pierce, in 50-cent packages.

**STRENGTH AND BEAUTY**  
Come with Dr. Pierce's Golden Medical Discovery. This is a blood cleanser and alternative that starts the liver and stomach into vigorous action. It thus assists the body to manufacture rich red blood which feeds the heart, nerves, brain and organs of the body. The organs work smoothly like machinery running in oil. You feel clean, strong and vigorous instead of tired, weak and faint.

## HOUSING REFORM IS BEFORE SENATE

STATE LAW MAKING BODY TO INVESTIGATE LIVING CONDITIONS TO ACT INTELLIGENTLY UPON PROPOSED KESSINGER LAW.

Springfield, Ill., Mar. 9.—A thorough investigation of the housing problem in Illinois will be begun next Monday in Chicago by a sub-committee of the senate judiciary committee appointed to hold hearings, and return a report on Senator Kessinger's housing bill. The sub-committee will have hearings each Monday either in Chicago or Springfield and the housing question will be thoroughly investigated.

In order to avoid the charge that the committee is junketing and going on joy rides, all of the members have agreed to pay their own expenses. This is one of the few examples of this sort in the history of the Illinois general assembly.

At the hearing next Monday morning Charles B. Ball, sanitary inspector of Chicago, will be heard. It is understood that Mr. Ball in common with other housing officials, wants Chicago exempted from the operation of the bill. It is contended that Chicago's one system provides a thorough housing method and a state law is not necessary.

Senator Kessinger, however, believes there is more need of housing reform in Chicago than in the down-state. He will oppose any amendments proposing exemption for Chicago.

Lawrence Veiller, of New York, representing the Russell Sage Foundation and an authority on housing reform, will appear before the committee at an early date. Others interested in housing, whether they favor or oppose the bill, will be asked to give their views before the committee. Inspection of various city districts also may be made by the members of the committee.

The Kessinger bill is voluminous. It goes into all classes of dwellings and makes stringent provisions for light, ventilation, sanitation, fire protection, maintenance and the necessary improvements. It has separate provisions for new buildings and for the alteration of old buildings. City councils may enforce stricter requirements, but cannot override the minimum requirements of the act.

The sub-committee which will make

the investigation is composed of the following:

Senator Kessinger, of Aurora, chairman; Senators Hughes, Gorman, Baldwin and Herlihy, of Chicago, Barr of Joliet, Dailey of Peoria, Turnbaugh of Mt. Carroll, Shaw of Lawrenceville, Roos of Forest Park.

A few members of the senate were in the city today and practically no business was done. The house bill increasing the number of cloak room employees in the senate was advanced from second to third reading. Adjournment was taken until next Tuesday.

### Be Careful in Using Soap on Your Hair

Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified coconut oil, for it is pure and entirely greaseless. Its very cheap, and beats the most expensive soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides it loosens and takes out every particle of dust, dirt and dandruff.
